

BDC token (Blockchain Data Center)

Litepaper

MDKI company

With its global partners, our vision is to open a new era of finance through innovative technologies and business models, which enables the global investors to participate in safe and transparent investment platform from anywhere at anytime.

Fintech: With collaboration with Bitfury, we are currently operating Blockchain Data Center with 300PH/s hashrate. Based on the hash, we are investing on blockchain projects as VC. Projects such as NFT Platform, World's First Hybrid Exchange, De-Fi service etc.

Real Estate Development : At Zamiin-Uud Free Trade Zone, you are consulting on Real Estate Development. Through our global partnerships, we are implementing Smart City and Autonomus Cluster Driving at the zone

Biotech: Through investment on innovative technologies, we are implementing cutting edge bio technology in Mongolia. Which we will expose to the public soon.

What is BDC

MDKI LLC operates a Blockchain Data Center at Kazakhstan, in corporation with Bitfury Group, one of the leading Blockchain Technology and mining company in the world. Through the BDC IEO, we are giving opportunities to the BDC holders to mine Bitcoin with low power rate and stable technology at our Canada Blockchain Data Center using the cutting-edge technology. As the Token Economy, 30% of the total BTC mined will be used as a reward and will be distributed to the staked token holders. 20% will be used for the Buy-Back & Burn-Out process, which will reduce the total token amount. 30% will be used for the Hash-Up process which will be used for the expansion of the Blockchain Data Center. The resting 20% will be used as electricity cost and maintenance fee.

BITCOIN MINING

The total number of bitcoin can be issued is limited to 210'000'000 so the total amount of bitcoin issue will be reached in 2140. The price has risen through three times of halves,

Through a joint investment on DAI with BITFURY, we have secured 300PH/s HASH and became a company with the largest number of hashes in Asia excluding China. .

The total number of Bitcoins that can exist in the world is 210'000'000. As researchers anticipate, this number will reach in 2140. Price of Bitcoin has risen to 60'000USD recently after 3 halvings. As Grayscale Investments LLC and many other experts say, Bitcoin is Digital Gold, and the price will keep rise.

We are mining in a safe and stable environment with low power rate and world leading Bitfury technology.

Thus, we are giving an opportunity to new users who want to invest in our Canada Blockchain Data Center to and receive Bitcoins every month.

BLOCK BOX AC

Features:

Hash Power: 40 PH/S

Electricity Consumption: 1.135MW

Size: 40' container

Performance monitoring to the level of a single component

Can be upgraded by swapping components

BDC IEO:

BDC IEO amount: 200'000'000 BDC , Network- KLAYTN

Presale 1: 70₯ |2021.12.27 – 2022.01.03|

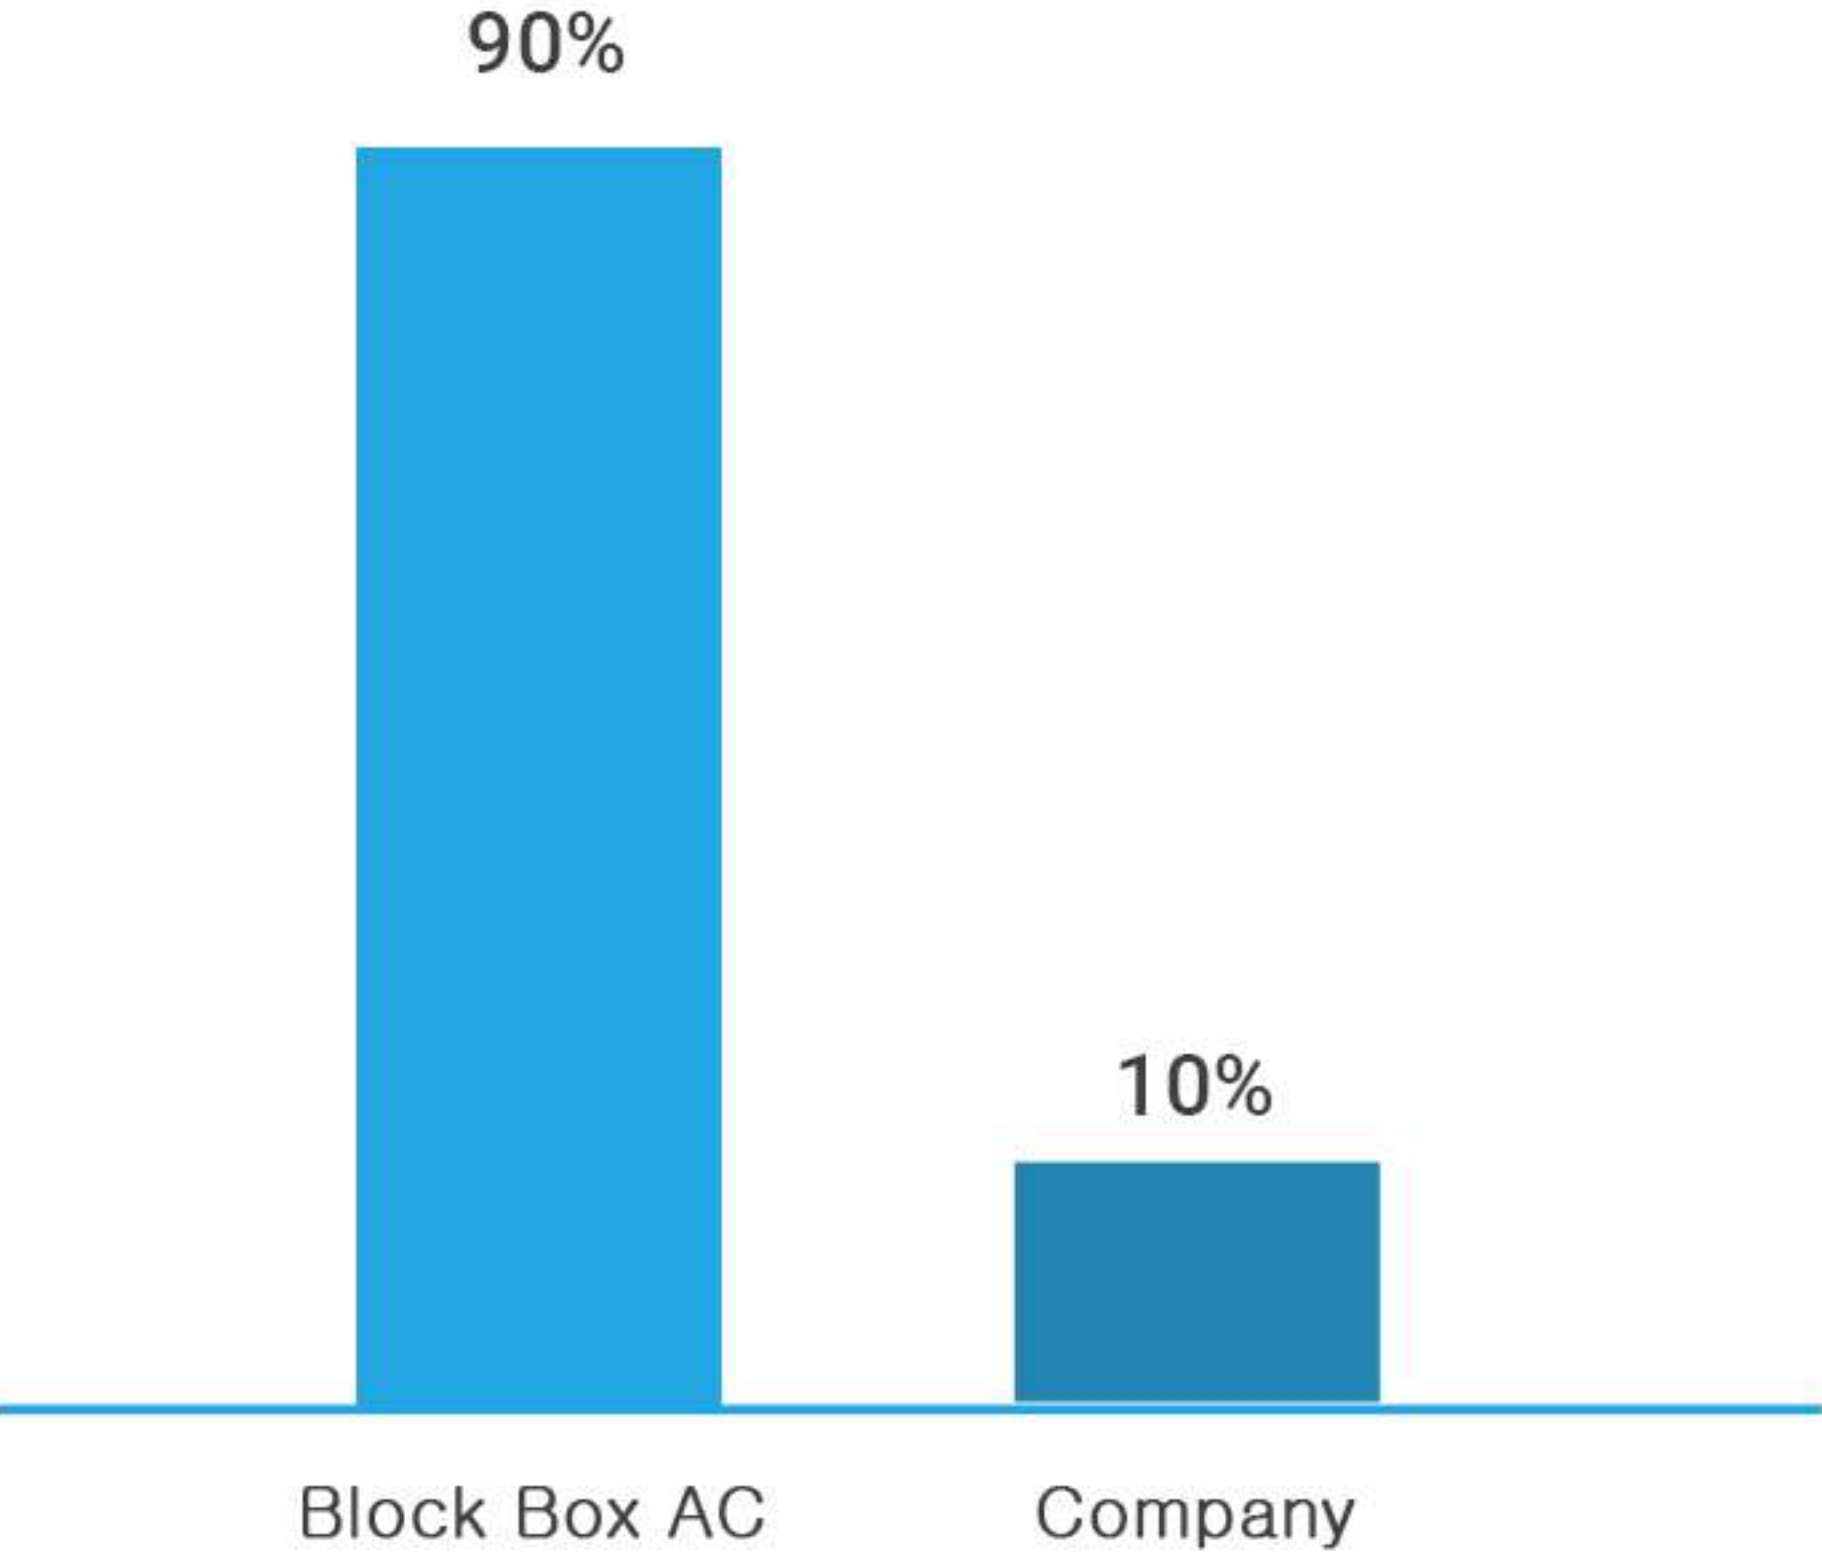

Presale 1: 90₯ |2022.01.17 – 2022.01.23|

Listing: 100₯ |2022.02.25|

Total Hash Power: 80PH/s |2 BlockBox ACs|

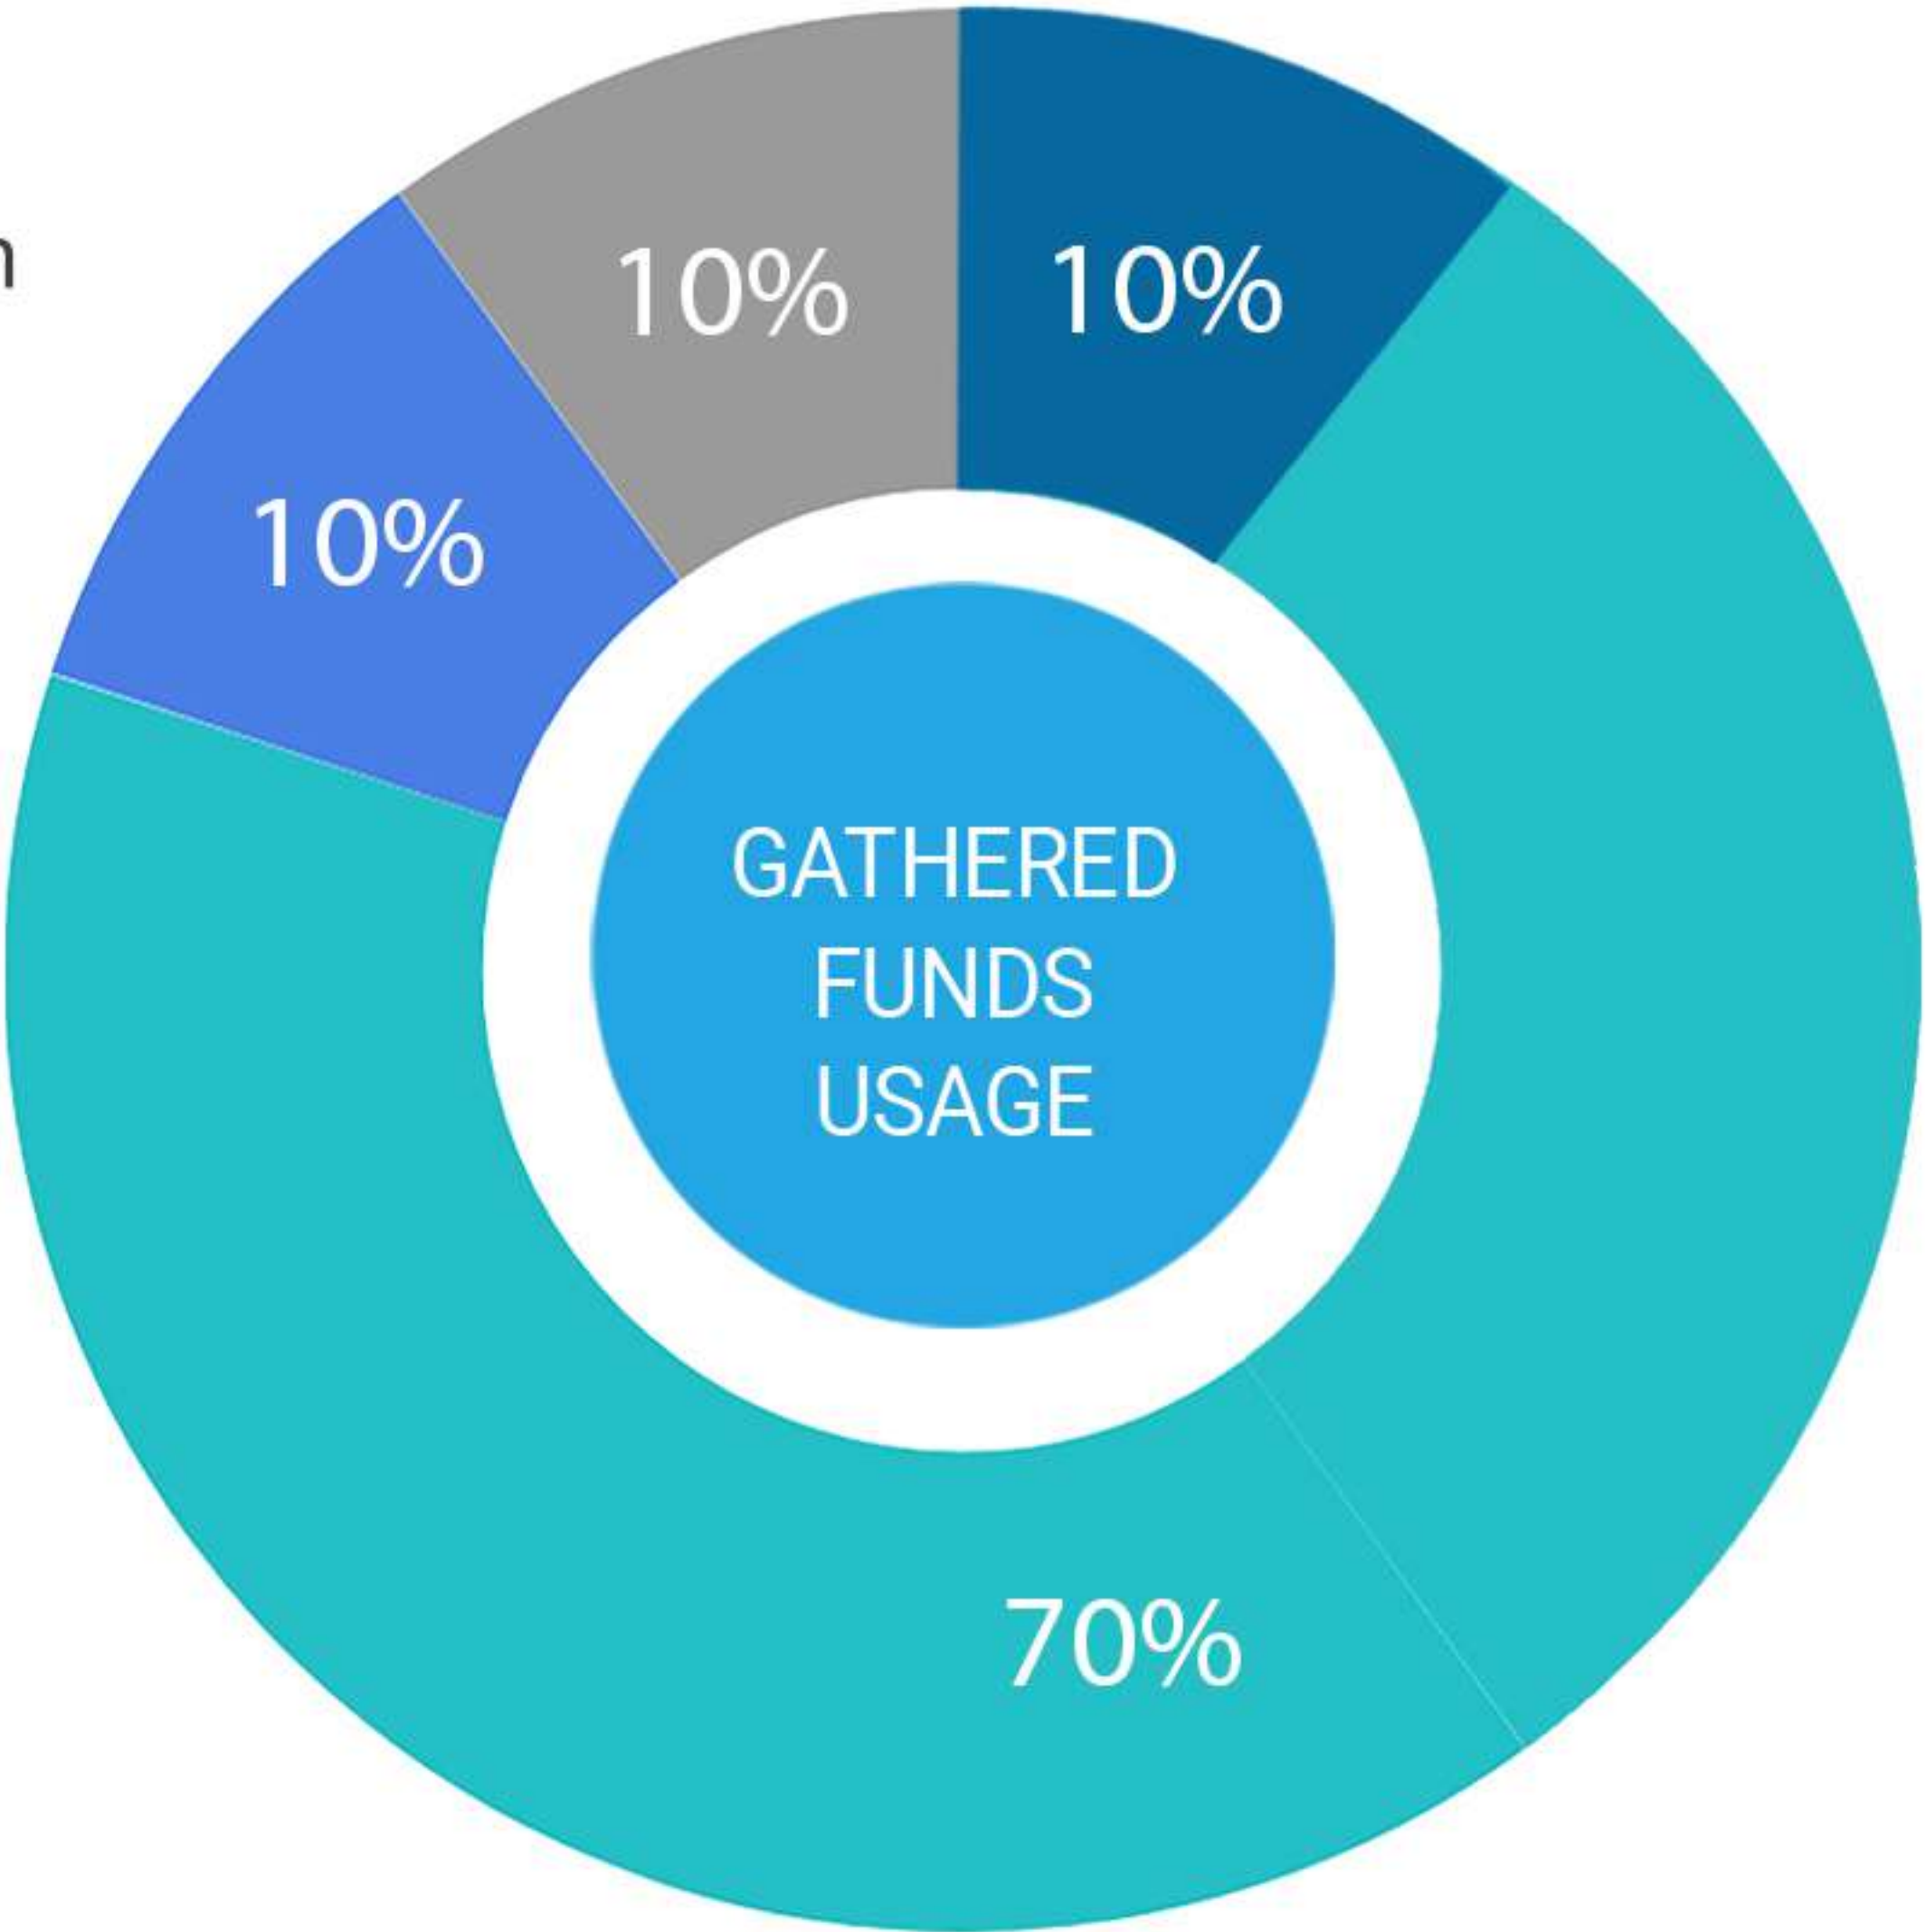

TOKEN ECONOMY

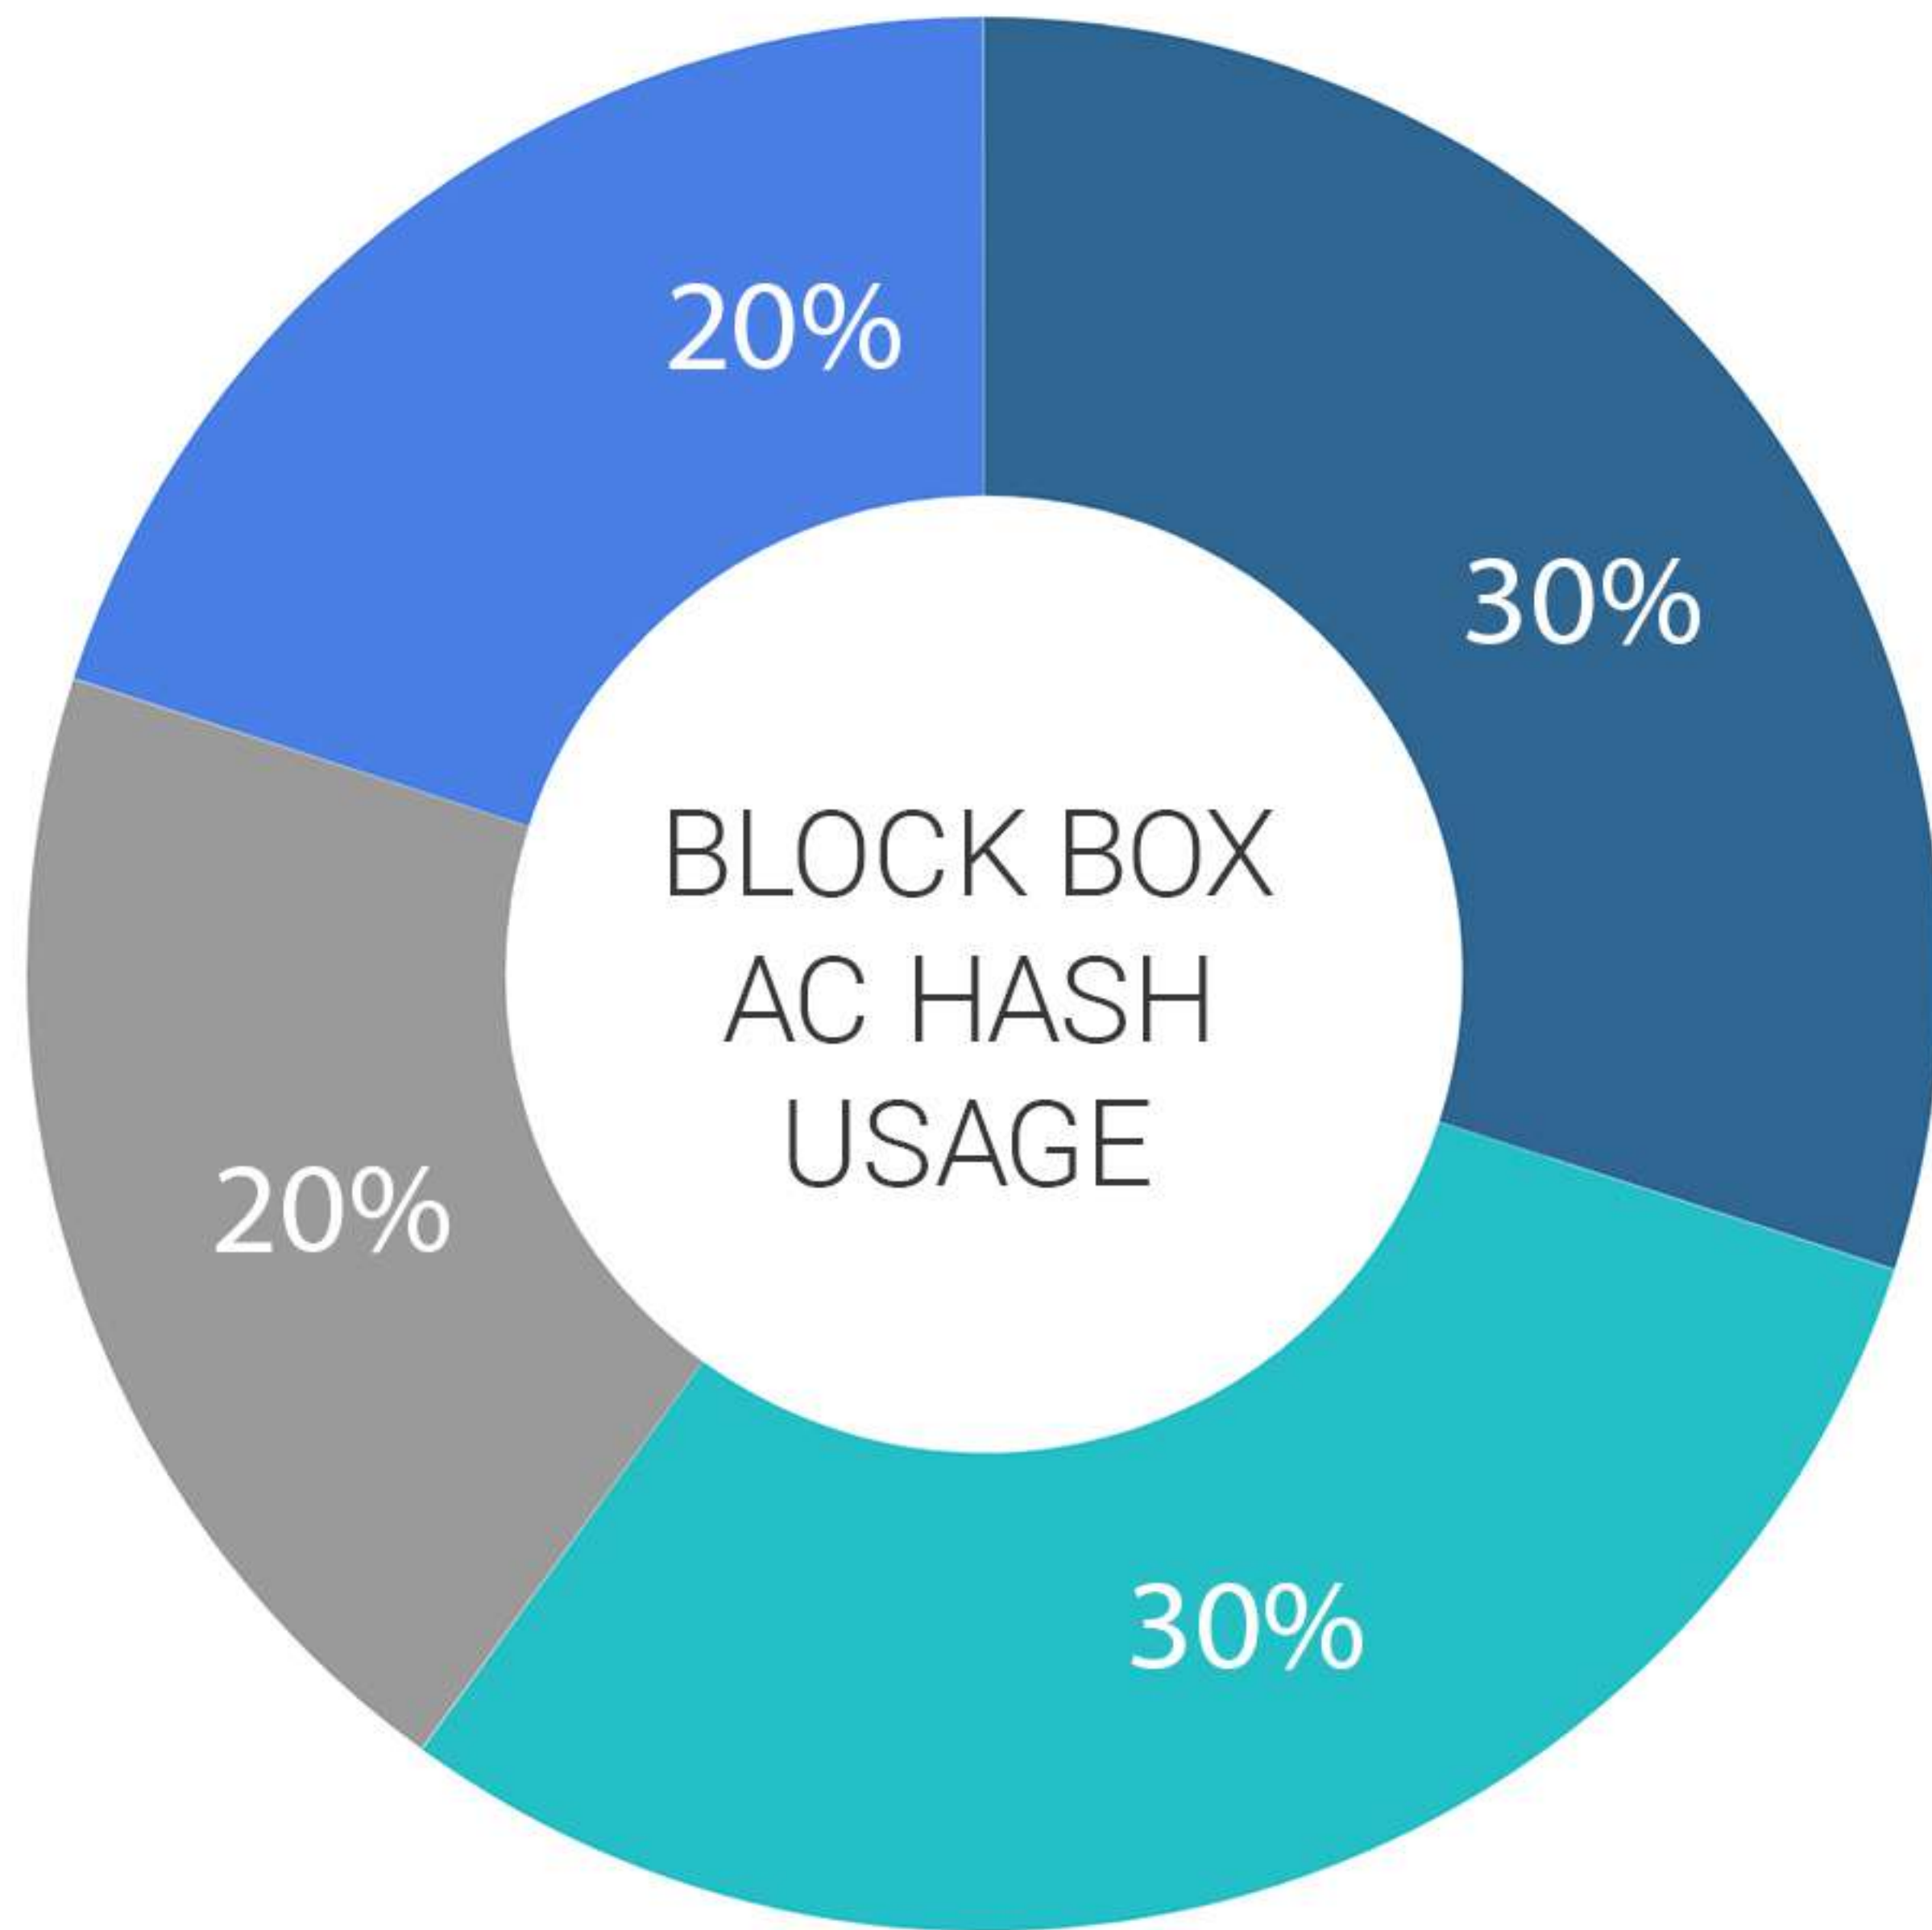

- 90% Blockchain Data Center Expansion
- 10% IEO Sale

FUND MANAGEMENT

- 70% Establishment of Blockchain Data Center
- 10% Development Cost
- 10% Marketing cost
- 10% Company revenue

BLOCK BOX AC HASH USAGE

30% Hash Up - Data Center Expansion

30% Bitcoin reward

20% Electricity and maintenance cost

20% Buy-Back & Burn-Out

WORLD NO.1 BITCOIN MINING TECHNOLOGY
